UC - CERTIFIED

EVOLVE2 RANGE

It's not just new in every way.
It's the new standard.

We spend 20% more time collaborating than we did six years ago, but available concentration time has shrunk by 10%.¹ It's time for a better way of doing things; enter Evolve2. We've re-engineered our world-leading Evolve Series² in every single way, allowing us to bring you significant performance enhancements across the board. These are professional headsets, but not as you know them. Welcome to the new standard.

A new standard of noise isolation

A range of headsets designed to cancel 54% more of the noise around you from the moment you put them on³, thanks to a superior acoustic design and enhanced memory foam padding, with incredible Active Noise Cancellation (ANC)⁴ for an added concentration boost.

Guard your concentration zone with an improved busylight

Our new and improved busylight is now more visible than ever, allowing you to be seen from every angle, for even fewer interruptions. So you can work in peace.

Raising the bar for professional calls

We took the incredible call performance of our world-leading Evolve Series² and made it even better, featuring an advanced digital chipset with three times more computational power and the latest signal processing technology, for 97% less background conversation noise on your calls³.

UC-certified means UC-satisfied

When collaboration is easy, everyone is happy, with both their Unified Communications (UC) platform and their headset. Each Evolve2 headset is UC-certified and available in a Microsoft Teams-certified variant, for truly seamless communication.

Amazing audio across the board

A range of professional headsets featuring powerful leak-tolerant 40mm speakers, along with our advanced digital chipset and the latest AAC codec⁴, for a richer audio experience and incredible call performance.

Comfort you can wear and wear

Designed using biometric measurements from hundreds of heads, for the ultimate all-day comfort, and finished using durable, premium materials. Comfort so good, you'll barely even feel it.

Future-proof tech that gets better with age

Upgradeable platform that will add even more value to your investment with future firmware upgrades through Jabra Xpress.

HOW TO START AND PAIR³

Plug the pre-paired Jabra Link 380 into a USB port on your computer

Slide the On/Off switch to the Bluetooth position and hold it there until the LED flashes blue

Follow the voice instructions in the headset to pair to your smartphone

HOW TO USE

Push volume + and - at same time to turn busylight on/off

Push x1

Press and hold for 1 sec

Push x1

Push x1

Press and hold for 1 sec

Push x1

Move the microphone boom arm down to answer an incoming call

Move boom up to mute, down to unmute
